

I am

Plasma  
donor

I'm trying to

Collect enough  
plasma for medical  
treatments.

But

Donating plasma is  
mostly a safe  
process, but there can  
be side effects.

Because

Some donors can  
experience fatigue,  
bruising, bleeding, or  
dehydration.

Which makes me feel

It takes only 24 hours  
for body to replenish  
its plasma.
